PROJECT TITLE: RescEU-CBRN-DSIM-RO

„Develop and maintenance of rescEU CBRN mobile laboratories and rescEU CBRN detection, sampling, identification and monitoring capacities”

APPLICANT: General Inspectorate for Emergency Situations (Inspectoratul General pentru Situații de Urgență - IGSU)

GENERAL OBJECTIVE: Develop, maintain and ensure the availability of mobile laboratory capacity and the capability to detect, sample, identify and monitor chemical, biological, radiological and nuclear (CBRN) substances/agents, to ensure a prompt response in the event of a CBRN event, both in the case of intentional and unintentional accidents.

PROJECT RESULTS:

- Development of an integrated capacity under the UCPM rescEU framework, comprised by 2 components: *1 CBRN Detection, Sampling, Identification and Monitoring capacity (CBRN DSIM)* and *1 mobile laboratory*;
- Organizing 3 trainings for rescEU CBRN-DSIM capacity and mobile laboratory group of experts (60 experts trained)
- Ensuring visibility materials within the project, in accordance with the EU visibility manual, promoting project activities and results on the IGSU website and other platforms designed for visibility with access to the general public.

BUDGET: EUR 16.968.500 (100% EU financed)

DURATION OF THE PROJECT: 36 months, from the 1st of October 2023 to 30th of September 2026
